Homeowners

Prepare Your Home

Hurricane research studies have shown that on average; homes built under the 2002 Florida Building Code sustained less damage and when paired with shutters may be safe to stay in as long as they are not in an evacuation area.

Homes built between 1994 and 2001 under the Standard Building Code sustained more damage and homes built before 1994 fared even worse.

Before storm season begins, take the following steps to protect your home:

- Secure loose rain gutters and downspouts, and clear clogged areas or debris.
- Secure and reinforce your roof, windows and doors, including garage doors.
- Consider building a FEMA safe room designed for protection from high winds and flood waters.
- Learn how and when to turn off gas, water and electricity.

Mobile or Manufactured Homes

Mobile homes are an unsafe shelter in high winds no matter how well fastened to the ground. Take precautions to ensure that your mobile home is properly secured to reduce possible damage to your home and your neighbor's property.

- Check tie-downs annually. Make sure straps are tight, properly aligned and not on an angle.
- Verify that ground anchors and stabilizer plates have been installed properly.
- Be sure support piers are in contact with the frame.
- Replace straps or ground anchors that show signs of corrosion or damage.

For detailed information or to verify a contractor's license, call the Department of Highway Safety and Motor Vehicles, Bureau of Mobile Home and Recreational Vehicle Construction at 850-617-3004.

Checklist for Sheltering in Place

- Clean bathtub or other large containers and fill with water.
- Drinking water, one gallon per person, per day, for at least three days.
- Canned food and a can opener.
- Paper items.
- Baby needs.
- Medications, prescriptions and a first aid kit.
- Battery-operated television or radio, flashlight and extra batteries.
- Cash (ATMs may be out-of-service).
- Pet supplies.
- Photocopies of important documents (birth certificate, license and insurance).
- Full tank of gasoline in your car.

What to bring with you

Evacuation center space can be limited depending on how many people seek evacuation. Please limit your belongings to: clothing and personal hygiene items for up to three (3) days. Limit one (1) suitcase/bag per person as space is limited. Bring clothing suitable for layering as the temperature of the evacuation center may vary.

- Pillow and quilt or heavier blanket.
- Two weeks of medications.
- Extra small "travel" bottles of oxygen, if applicable.
- Walker/cane if needed.
- Wheelchair or electric scooter and charger, if applicable (**NOTE:** the schools are very big and hallways are very long).
- Any medical equipment/supplies needed (i.e. sharps container, catheters, incontinence supplies, c-pap, etc.).
- Special dietary foods, in a cooler, as special diets cannot be accommodated.
 - There is no refrigeration space for food and only limited space for medications.

Additional items to bring:

- List of current medications.
- Phone numbers for emergency contacts and doctors.
- Address and phone number of where you will go if you cannot go back to your home (due to damage or no power) when the storm is over. This is very important as the evacuation centers will close and a back-up place of residence may be needed.
- Extra battery for phones and personal electronic devices as only essential medical equipment will be plugged in if the power goes out and the evacuation center is on generator power.

Be sure to label (name and phone number) all equipment and belongings. This will help us make sure you receive your items if lost or left behind at the evacuation center.

Before you leave your home be sure to leave your answering machine on or a porch light on to make it easier to determine if your electric has been restored.

Safety tips for medically-dependent people

- Install fire safety devices in the home.
- Test alarms and extinguishers regularly and replace smoke alarm batteries every six months.
- Keep a flashlight, whistle or bell handy to signal your whereabouts to others.

MEDICAL NEEDS

About the program

Sarasota County residents with qualifying medical needs are encouraged to apply for registration as a medically-dependent person (MDP). It is important to apply in advance for this program so, if qualified, you will be on the county's registry for transportation and sheltering at a medically-dependent Evacuation Center during a disaster. Pre-registration helps us to help you when time is limited.

All MDPs must bring a caregiver to the designated medically-dependent evacuation center. The caregiver must be able to:

- Assist you with all activities of daily living, including dressing and toileting.
- Lift you to/from toilet and cot and wheelchair as needed.
- Assist you with walking (with or without walker), assist with wheelchair.
- Transport food from cafeteria to you as needed.
- Assist with medication and any treatments as needed.
- Monitor your oxygen usage.
- Provide evacuation center management with a discharge plan in the event the you cannot return to your home.

You are permitted to bring your spouse/significant other and dependents (limited to high school age and below, living in same household) with you in addition to your caregiver. Many times the caregiver is a spouse/significant other; please be sure he/she can fulfill the caregiver responsibilities outlined above.

There is no guarantee that household members will be housed in the same room as you or that bedding/cots are will be available for them.

How to Apply
