

TRI-PAR ESTATES

PARK & RECREATION DISTRICT
1616 Presidio St., Sarasota, FL 34234
(941) 355-8747; Fax (941) 360-0060

Dear Tri Par Resident:

Our existing Comcast Cable TV contract ends this year in December of 2023. We would like to present the options we have reviewed as a potential new agreement. We have narrowed it down to 3 companies, 2 (Comcast & Frontier) of which already have services in Tri Par, and the 3rd (Hotwire) company would need to install their Fiber in Tri Par.

We must get our "bulk" agreement finalized in the next few months as we need to budget correctly for any changes in the yearly assessment and to make a seamless change if we switch providers. Bulk Agreements save residents substantial money over retail rates. For instance, our current Comcast TV agreement is approximately \$38 per month and the retail rate is \$65.45 per month. A savings of over \$300 per year. Overall, residents can expect to save anywhere from 40% to over 65% over retail rates depending on what provider is chosen by your Board of Trustees.

You are receiving this packet of information to see the different proposals and to assist the Tri Par Board of Trustees in making their decision. Also included is an opinion poll where you can register your preferences. Included in this envelope is:

1. This cover letter
2. A comparison of the proposals by service and cost
3. A recap of how which services will affect the yearly Assessment
4. TV Channel Listings
5. Internet/Wi-Fi Informational FAQ
6. Opinion Poll (survey)
7. Self-addressed envelope (needs a stamp if mailed, please)

We plan to have workshops where we can discuss the options in a public forum. Please remember to fill out the opinion poll and return it to the Tri Par office by email, hand delivery, or drop in the mail. To be considered, your Opinion Poll must be returned to us no later than February 10, 2023.

If you still have questions, call the office at 941-355-8747, or drop us an email at general@triparestates.com. You may also FAX us at 941-360-0060.

Thanking you in advance for your assistance,

Tri Par Board of Trustees

Is it better to stream TV shows or have Cable Tv?

There are pros and cons to both streaming TV shows and having cable TV. It ultimately depends on your personal preferences and what you value most in a television service.

Some advantages of streaming TV shows include:

- Lower cost: Many streaming services are cheaper than cable TV packages, especially if you only want to subscribe to a few specific channels.
- More flexible viewing options: With streaming, you can watch shows on your own schedule and on a variety of devices, such as smart TVs, phones, tablets, and laptops.
- A wider selection of shows: Streaming services often have a larger selection of TV shows and movies, including exclusive content that you can't find on cable.

Some advantages of having cable TV include:

- Live sports: If you're a fan of live sports, cable TV might be a better option for you, as many streaming services don't offer live sports.
- No internet required: With cable TV, you don't need an internet connection to watch shows. This can be convenient if you have a spotty internet connection or if you want to watch TV while traveling.
- More channels: Cable TV packages typically offer a wider range of channels than most streaming services, so you might have more options for things to watch.

In summary, if you're looking for a lower-cost option with flexible viewing and a wide selection of shows, streaming might be the way to go. If you value live sports and a wide range of channels, and don't mind paying a bit more, cable TV might be a better fit.

Is it easy to stream TV shows?

Streaming TV shows can be easy and convenient, as it allows you to watch your favorite shows on demand, at a time that is convenient for you. There are a variety of streaming services available, such as Netflix, Hulu, and Amazon Prime Video, that offer a wide selection of TV shows and movies.

To stream TV shows, you will need a few things:

A device that is capable of streaming video, such as a smart TV, a streaming media player (like a Roku or Amazon Fire Stick), or a smartphone or tablet.

A high-speed internet connection. Streaming video requires a lot of bandwidth, so you will need a fast and stable internet connection to ensure a smooth streaming experience.

A subscription to a streaming service. Most streaming services offer a free trial period, which allows you to try out the service before committing to a subscription.

Once you have these things, you can usually start streaming TV shows by simply selecting the show you want to watch and pressing play. The process can vary slightly depending on the streaming service and device you are using, but it is generally straightforward.

Is it important to have internet at home?

- The internet has become an integral part of daily life for many people and having internet access at home can be important for several reasons. Here are a few examples:
- **Communication:** The internet allows you to easily stay in touch with friends and family through email, social media, and messaging apps.
- **Education:** The internet is a valuable resource for students, as it provides access to a vast amount of information, as well as online educational resources like online courses and video lectures.
- **Work:** Many people rely on the internet to do their job, whether that means working remotely or simply using the internet to research and communicate with colleagues.
- **Entertainment:** The internet provides access to a wide range of entertainment options, including streaming services, online games, and social media.
- **Shopping:** The internet has made it easier than ever to shop for goods and services online.
- Overall, the internet can be an important tool for communication, education, work, entertainment, and more.
- Camera's work from the internet and can stream images 24/7 to the homeowner thousands of miles away to help troubleshoot issues. Many people use Wi-Fi thermostats to monitor the temperature in their home.
